Knowledge Anywhere-Anytime

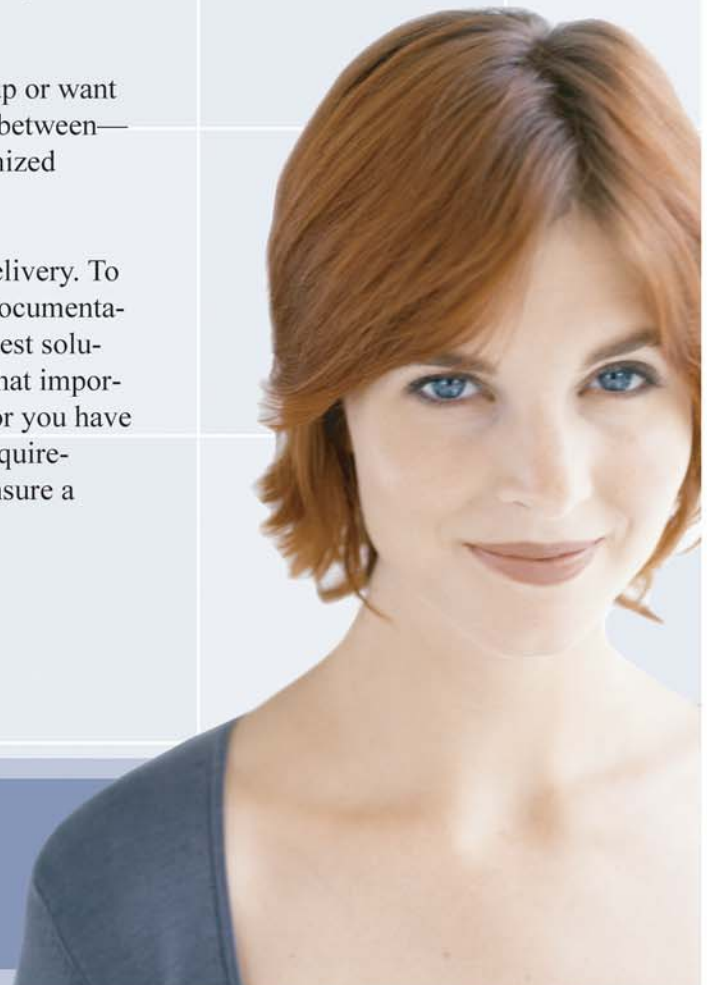

e-Learning

A premier provider of custom online training and blended learning content, K2Share offers expertise in subject areas as varied as regulatory compliance and technical application training. Experienced in developing total solutions, K2Share uses focused project management and a learner-centric instructional design methodology to deliver a results-oriented end product.

We strongly believe in tailoring training to fit each client's needs. Our team of professionals will work closely with you to discuss your requirements and expectations and help you to identify the key business drivers in your organization. Our design methodology is responsive to the goals of your staff and addresses areas that are core to your organization's requirements. The development and implementation of learning solutions will be designed to mirror the style of your organization and achieve the results you need.

Whether you require online training that is accessible via dialup or want a fully interactive, high-end training solution—or anything in-between—K2Share has the experience and capability to provide a customized solution to suit your organization's training requirements.

Of course not all types of training lend themselves to online delivery. To that end K2Share offers an extremely broad range of custom documentation services. Perhaps job aids or workbooks would offer the best solution to your employees? Need a high quality presentation for that important conference? Perhaps you need a user guide for a product or you have a user guide and need it translated? Whatever your needs or requirements, K2Share professionals will work closely with you to ensure a high-quality end product.

WBT Examples

HTML

HTML provides users with an appealing text and image-centered delivery format. The very fast load times make this option an attractive solution for many.

Flash

Macromedia® Flash™ allows for the creation of interactive elements that greatly increase the learning experience while preserving fast load times for all users.

Flash with Audio

Adding audio to interactive Flash elements makes for an engaging educational environment that couples advanced functionality with reasonable loading times.

Dynamic Flash Video

Designed for intranets and broadband users, this combination of Flash, video and XML provides students with a highly dynamic learning experience.
